HomeShield Claims Guide (Form HS-G01)

HomeShield Insurance Company | Edition 03/2026

This guide explains how to make a claim and how we review it. It does not change the terms of your policy.

SECTION 1 MAKING A CLAIM

1.1 How to report a claim

You can report a claim online, by telephone or through your agent. Please report a loss as soon as you can. Delay can make it harder to establish the cause of the damage.

1.2 What to include

Include your policy number, the date and place of the loss, a short description of what happened, and clear photographs of the damage taken from several angles and distances.

1.3 Storm claims

For hail and windstorm claims, give the date of the storm and the address of the home. We use these details to check independent weather data for that day and place.

1.4 Water claims

For water claims, stop the source of the leak if you can do so safely, and photograph the damage before you clean up.

1.5 Fire claims

For fire claims, contact the fire service first. Tell us as soon as it is safe to do so, and do not throw away damaged items until we have seen them.

SECTION 2 HOW WE REVIEW A CLAIM

2.1 What we look at

We review the photographs you send, the wording of your policy and, for storm claims, independent weather data. We may also ask for an inspection by an adjuster.

2.2 Use of automated tools

We may use automated tools to help prepare a first assessment. These tools only advise. A claims professional makes every decision, and no claim is denied by an automated tool alone.

2.3 Time to decide

We aim to acknowledge a claim within 3 business days and to decide it within 30 days of receiving the information we need.

2.4 If you disagree

If you disagree with our decision, you can ask us to review it, send us more evidence, or contact your state insurance regulator.
