HomeShield Water Damage Endorsement (Form HS-E21)

HomeShield Insurance Company | Edition 03/2026

This endorsement changes your HomeShield Homeowners Policy. Please keep it with your policy.

SECTION 1 ABOUT THIS ENDORSEMENT

1.1 How this endorsement works

This endorsement changes the HomeShield Homeowners Policy (Form HS-100). It applies when it is listed in your Declarations. Where it conflicts with the policy form, this endorsement applies. All other terms stay the same.

SECTION 2 WATER DAMAGE TERMS

2.1 Sudden and accidental escape of water

We cover sudden and accidental escape of water from fixed pipes, tanks and household appliances, and the resulting damage to ceilings, walls, floors and insured contents.

2.2 Finding the source of a leak

We cover the reasonable cost of finding the source of a covered escape of water, including opening walls or floors, and the cost of closing them again.

2.3 Gradual leakage

Continuous or repeated seepage or leakage from a plumbing system, a roof or an appliance over a period of 14 days or more is not covered.

2.4 Flood and sewer backup

Flood, surface run-off, groundwater, storm surge and backup through sewers or drains are not covered unless a flood endorsement is listed in your Declarations.

2.5 Frozen plumbing

We cover damage caused by the freezing of a plumbing system if you kept the dwelling heated, or if you shut off the supply and drained the system before leaving it unheated.

2.6 Evidence for a water claim

For a water claim, we may ask for photographs of the damaged area and of the source of the leak, a plumber's report, and repair invoices.

2.7 Stopping the damage

If it is safe to do so, turn off the supply to stop the escape of water and move your belongings out of the affected area. We cover the reasonable cost of emergency measures to prevent further damage.
